alexanderkalema

I am a **Computer Science major** at Addis Ababa University. As a motivated and dedicated student applying for **a flutter opening**. I love to build impactful software solutions through a continuous process of learning, feedback, and self improvement. My commitment to going **above and beyond** on projects, delivering **high quality work**, and collaborating effectively with teammates has allowed me to take ownership of complex **production applications from end to end** earlier in my career than many peers. Overall, I am a motivated individual looking to further boost my career at a company where I can contribute to meaningful work. Please visit my **personal website** for an in-depth view of my work so far.

• Scored 621 in my UEE. I got a recognition letter and a tab from A.A Bureau of Education.

• A recognition certificate for my contribution in my time at Internsavy.

• Linkedin course completion certificates for "HTML Essential Training", "Programming Foundations: Databases", "Succeeding in Web Development: Full stack and Front End".

• My greatest achievement, for me, is the large and complete cafe system for Ethiopia's innovation and technology ministry, which is used on a daily basis for placing, managing order and inventory. I have received a certification for this role.
